

## **ACKNOWLEDGEMENTS**

The objective to organize this International Summit “Himalayan Small Hydropower Summit”, is to have a fair appraisal of status of small hydropower development and requirements of further boost in this sector. This will create more confidence in SHP developers by reducing the investment risk and shortening the time frame for developing SHP sites and would enable to the commissioned plants to achieve optimal generation.

The organizers are thankful to the SHP developers who have sponsored the advertisements to bring out this publication.

The organizers are highly grateful to authors of the papers who have contributed the research/resource papers to make this International Summit possible.

The organizers highly appreciate the efforts put in by the participants especially from abroad who are able to participate and contribute at such short notice. The organizers appreciate the timely support, advice and comments from Energy Department, Uttarakhand Renewable Energy Development Agency, Government of Uttarakhand and faculty from Department of Civil Engineering, Hydrology & Earth Sciences, Indian Institute of Technology, Roorkee.
